PROFESSOR SIR NEVILL MOTT

VOL. XXXVI

JULY—DECEMBER 1977

EUROPHYSICS JOURNAL

LONDON:
TAYLOR & FRANCIS LTD, 10-14 MACKLIN STREET WC2B 5NF

" Meditationis est perscrutari occulta ; contemplationis est admirari perspicua . . . . Admiratio generat quæstionem, quæstio investigationem, investigatio inventionem."—*Hugo de S. Victore.*

——" Cur spirent venti, cur terra dehiscat,
Cur mare turgescat, pelago cur tantus amaror,
Cur caput obscura Phœbus furrugine condat,
Quid toties diros cogat flagrare cometas,
Quid pariat nubes, veniant cur fulmina cœlo,
Quo micet igne Iris, superos quis conciat orbes
Tam vario motu."

J. B. Pinelli ad Mazonium.

CONTENTS OF VOL. XXXVI. Nos. (1–6)

NUMBER 1—JULY

PAGE

The structure of rare earth metals in the liquid state
By Y. Waseda and S. Tamaki 1

Contribution to the statistical treatment of interstitial solid solutions in the case of repulsive interactions
By G. Boureau and J. Campserveux 9

Analytical formulae for d.c. hopping conductivity
By P. N. Butcher, K. J. Hayden and J. A. McInnes 19

States in the gap in chalcogenide glasses
By N. F. Mott and R. A. Street 33

Serration and dissociation of edge dislocations in low angle tilt boundaries in gold
By T. P. Darby and R. W. Balluffi 53

Microdiffraction. Application to short-range order in a quenched copper–platinum alloy
By J.-P. A. A. Chevalier and A. J. Craven 67

Thermoelectric power and thermal conductivity. An integral method—aluminium
By R. B. Roberts and R. S. Crisp 81

The absolute scale of thermoelectricity
By R. B. Roberts..... 91

The temperature dependence of the electrical resistivity of Al-6·8 at.% Zn
By J. Perrin and P. L. Rossiter 109

Annealing studies of voids in neutron-irradiated aluminium single crystals by positron annihilation
By V. W. Lindberg, J. D. McGervey, R. W. Hendricks and W. Triftshäuser..... 117

Chemical bonding effects on the diffraction intensities in amorphous silicon and carbon
By B. Stenhouse, P. J. Grout, N. H. March and J. Wenzel..... 129

The formation and properties of faulted dipoles
By C. B. Carter 147

On the mobility of dislocations in germanium and silicon
By A. M. Gómez and P. B. Hirsch 169

Phase separation of Fe–Al alloys with Fe_3Al order
By Samuel M. Allen 181

The Compton defect
By R. J. Weiss, M. J. Cooper and R. S. Holt..... 193

High energy electron impact spectroscopy measurement on the Compton defect
By A. D. Barlas, W. Rueckner and H. F. Wellenstein 201

An X-ray topographic study of the behaviour of vacancy loops formed during the high-temperature oxidation of magnesium crystals
By R. Vale and R. E. Smallman 209

Scaling relations in magnetic, mechanical and superconducting pinning theory
By H.-R. Hilzinger 225

Macles de déformation dans l'alliage ordonné Ni_2Cr
Par A. Lépinay, J.-P. Eymery, J.-C. Desoyer et H. Garem..... 235

NUMBER 2—AUGUST

PAGE

The Debye–Waller factor for nickel by molecular dynamics simulation
By S. K. MITRA and P. SCHOFIELD 245

Transients in steady-state plastic deformation produced by changes of strain rate
By Z. S. BASINSKI, P. J. JACKSON and M. S. DUESBERY 255

Oriented growth of $BaCl_2$-phases in crystals of NaCl-1% $BaCl_2$. I. Morphology
By K. N. SWAMY RAO and A. S. PARASNIS 265

On the relationship between projected crystal potential and the form of certain zone axis patterns in high energy electron diffraction
By M. D. SHANNON and J. W. STEEDS 279

The dependence of zone axis patterns on string integrals or the number of bound states in high energy electron diffraction
By J. W. STEEDS, P. M. JONES, J. E. LOVELUCK and K. COOKE 309

Point defect–dislocation interaction in a crystal under tension
By E. J. SAVINO 323

The dependence of the conduction electron wave function on the lattice symmetry
By G. EREZ and A. LIVNAT 341

On the absorption of dislocations by grain boundaries
By R. C. POND and D. A. SMITH 353

A note on interaction energies associated with cracks in anisotropic solids
By N. LAWS 367

Measurement of the lattice displacement across a coincidence grain boundary
By J. W. MATTHEWS and W. M. STOBBS 373

Stage III migration of point defects in molybdenum
By K. PETERSEN 385

The mechanism of diffusion of iron in niobium
By D. ABLITZER 391

Photogeneration of charge carriers and recombination in amorphous semiconductors
By N. F. MOTT 413

Electron microscopy study of enantiomorphic ordered structures
By R. PORTIER, D. GRATIAS and M. FAYARD 421

On the existence of pre-melting and after-melting effects. A neutron scattering investigation
By J. K. KRISTENSEN and R. M. J. COTTERILL 437

A transmission electron microscopy investigation of the melting transition
By R. M. J. COTTERILL and J. K. KRISTENSEN 453

Electron excitation and the optical potential in electron microscopy
By R. H. RITCHIE and A. HOWIE 463

Molecular orbital theory of electronic transitions at the vacancy in diamond
By J. E. LOWTHER 483

Correspondence:

A comment on ' Electron microscopy of " giant " platelets on cube planes in diamond '
By A. R. LANG 495

NUMBER 3—SEPTEMBER

Madelung calculations for the spinel structure
By P. THOMPSON and N. W. GRIMES 501

Strengthening of adhesive joints by dislocations
By K. KENDALL 507

PAGE

A Monte Carlo study of sodium diffusion in β-alumina
By G. E. Murch and R. J. Thorn 517

Computer simulation of ionic conductivity. Application to β″-alumina
By G. E. Murch and R. J. Thorn 529

Thermoelectric power in phosphorous doped amorphous silicon
By D. I. Jones, P. G. Le Comber and W. E. Spear 541

Electrical conductivity and thermoelectric power of substitutionally doped amorphous silicon
By L. Friedman 553

Dislocation climb sources activated by 1 MeV electron irradiation of copper–nickel alloys
By P. Barlow and T. Leffers 565

Dissociated structure of dislocation loops with Burgers vector $a\langle 100\rangle$ in electron-irradiated Cu–Ni
By J. B. Bilde-Sørensen, T. Leffers and P. Barlow 585

Inclusion-generated dislocation clusters in liquid phase epitaxy
By G. R. Woolhouse 597

Self-absorption and the effect of exciting voltage on the soft X-ray emission edge of Li and other light metals
By R. S. Crisp 609

The influence of the surface on the phosphorescent state ($^3B_{1u}$) of benzene in doped rare-gas solids
By S. S. Hasnain, P. Brint, T. D. S. Hamilton and I. H. Munro 629

Structural description of iron–silicon amorphous alloys
By Ph. Mangin, G. Marchal, B. Rodmacq and Chr. Janot 643

Analytical formulae for d.c. hopping conductivity. Degenerate hopping in wide bands
By P. N. Butcher and K. J. Hayden 657

Electronic states associated with the sixty-degree edge dislocation in germanium
By R. Jones 677

Analysis of Au nuclei interactions on a (100) KCl surface
By E. M. Chan 685

Photoconductivity and recombination in doped amorphous silicon
By D. A. Anderson and W. E. Spear 695

The creep of quartz single crystals, with special reference to the mechanism by which water accommodates dislocation glide
By A. Ayensu and K. H. G. Ashbee 713

Diffusion in the vanadium system
By J. Pelleg 725

A discrete-continuum hybrid method for dislocation-point defect interactions
By H. L. Heinisch, Jr. and G. Sines 733

A mechanical instability hypothesis for melting in the alkali halides
By J. L. Tallon, W. H. Robinson and S. I. Smedley 741

Correspondence:

Zeroth-order calculations of the energy of movement of vacancies in alkali halides
By K. Tharmalingam 753

On the importance of subgrain size to the creep rate
By A. K. Miller, S. L. Robinson and O. D. Sherby 757

Erratum 761

NUMBER 4—OCTOBER

PAGE

Observations of oblique magnetic domain walls in nickel single crystals by X-ray topography
By W. J. Boettinger, H. E. Burdette and M. Kuriyama 763

An ultrasonic study of the elastic phase transition in In–Cd alloys
By M. R. Madhava and G. A. Saunders 777

High-resolution reflex images of defects in crystals
By L. A. Bursill and J. C. Barry 797

Impression creep of LiF single crystals
By E. C. Yu and J. C. M. Li 811

Monte Carlo simulation of polytypes
By S. Ramasesha and C. N. R. Rao 827

***In situ* study of radiation damage in thin foils of gold by high voltage electron microscopy**
By M. O. Ruault 835

Dependence of the critical current density of superconductors on the past history of the magnetic field and the temperature
By H. Küpfer and W. Gey 859

Self-diffusion in crystalline adamantane
By J. Bleay, P. W. Salthouse and J. N. Sherwood 885

Random walks on three-dimensional lattices: A matrix method for calculating the probability of eventual return
By M. Koiwa 893

Studies of voids in neutron-irradiated aluminium single crystals. III. Determination of void surface properties
By R. W. Hendricks, J. Schelten and G. Lippmann 907

Climb model of extended dislocations in f.c.c. metals
By J. Grilhé, M. Boisson, K. Seshan and R. J. Gaboriaud 923

Lattice imaging of a grain boundary in crystalline germanium
By O. L. Krivanek, S. Isoda and K. Kobayashi 931

Metal–non-metal transition in silver chalcogenides
By P. Junod, H. Hediger, B. Kilchör and J. Wullschleger 941

A trap-limited model for dispersive transport in semiconductors
By J. M. Marshall 959

Meeting at the Allen Clark Research Centre of the Plessey Company

I. Multiphonon recombination processes
By N. F. Mott 979

II. Non-radiative processes in insulators and semiconductors
By A. M. Stoneham 983

III. Non-radiative relaxation at metal-ion point defects in solids
By D. J. Robbins and A. J. Thomson 999

IV. Non-radiative transition probabilities
By N. Robertson and L. Friedman 1013

V. A two stage model for deep level capture
By R. M. Gibb, G. J. Rees, B. W. Thomas, B. L. H. Wilson, B. Hamilton, D. R. Wight and N. F. Mott 1021

NUMBER 5—NOVEMBER

PAGE

Transmission electron microscope studies of Nb–Ge superconducting films
By A. G. Cullis, J. M. Poate and L. R. Testardi 1035

Misfit dislocations in the epitaxial (111) Cu_2O/(111) Cu system
By J. H. Ho and R. W. Vook 1051

Atomic order effects in liquid binary and ternary alloys
By M.-C. Bellissent-Funel and P. J. Desré 1063

The mechanical and physical properties of polymeric sulphur nitride
By A. T. Davidson and A. D. Yoffe 1083

On the core structures of misfit dislocations in grain boundaries
By P. H. Pumphrey, H. Gleiter and P. J. Goodhew 1099

The nature of dislocations in high-angle grain boundaries
By H. Gleiter 1109

Mechanisms of deformation in cross-linked polyethylene crystals
By P. Allan and M. Bevis 1121

A correlation of periodicities in diffraction patterns and images from a grain boundary
By C. T. Forwood and L. M. Clarebrough 1131

Field dependent dispersive hole transport in amorphous As_2Se_3
By G. Pfister 1147

On dispersive transport by hopping and by trapping
By M. Pollak 1157

Flußverankerung in Supraleitern mit verschiedenen Hindernisanordnungen
Von Ludwig Schultz 1171

Initiation of crazes in polystyrene
By A. S. Argon and J. G. Hannoosh 1195

Growth of crazes in glassy polymers
By A. S. Argon and M. M. Salama 1217

On the electronic structure of carbon in α-iron
By C. Demangeat, F. Gautier and J. C. Parlebas 1235

The temperature dependence of the resistivity of liquid lead
By M. Davidović, F. Vukajlović, S. Zeković and V. Veljković 1257

Correspondence:

Correction for errors in microstrain values from X-ray diffraction line profiles
By Th. H. de Keijser and E. J. Mittemeijer 1261

A comment on the Compton defect at high momentum transfer
By P. Pattison and S. Manninen 1265

Experimental evidence for electron correlation effects in hopping conduction at low temperatures
By J. Baixeras, J. Chevallier and P. Andro 1269

Optical absorption and metal–insulator transitions in Ti_4O_7
By D. Kaplan, C. Schlenker and J. J. Since 1275

A property of interface dislocations
By Maria Comninou 1281

Maximum metallic resistance
By C. J. Adkins 1285

NUMBER 6—DECEMBER

PAGE

Professor Sir Nevill Mott, Nobel Laureate, 1977

A theory of a.c. conduction in chalcogenide glasses
By S. R. ELLIOTT 1291

Growth kinetics and ' preference factor ' of Frank loops in nickel during electron irradiation
By M. H. YOO and J. O. STIEGLER 1305

The study of dipoles in Cu–Al alloys using weak-beam electron microscopy
By E. WINTNER and H. P. KARNTHALER 1317

Geometric factors in f.c.c. and b.c.c. metal-on-metal epitaxy. Part I. Deposits of Cu and Ni on (001) Ag
By L. A. BRUCE and H. JAEGER 1331

A nuclear magnetic resonance study of the precipitation sequence of metastable phases in an Al–4 wt.% Cu alloy
By F. NAKAMURA, N. MATSUMOTO, K. FURUKAWA and J. TAKAMURA... 1355

Mössbauer spectrum of ^{57}Fe associated with a vacancy in aluminium
By H. ICHINOSE, K. SASSA, Y. ISHIDA and M. KATO 1367

A study of the atomic structure of twin boundaries in body-centred cubic crystals by electron microscopy
By K. MARUKAWA 1375

Dislocations in ice as revealed by etching
By N. K. SINHA..... 1385

The temperature dependence of the dislocation charge in potassium chloride
By W. H. ROBINSON, J. L. TALLON and P. H. SUTTER 1405

The surface structure of (111) gold films sputtered in the high voltage electron microscope. A theoretical model
By D. CHERNS 1429

Negative magnetoresistance in glassy carbon
By R. R. SAXENA and R. H. BRAGG 1445

Shell-model calculations of interaction energies between point defects and dislocations in ionic crystals
By M. P. PULS, C. H. WOO and M. J. NORGETT..... 1457

The direct imaging of a linear defect using diffuse scattering in Zr–Nb b.c.c. solid solutions
By T. S. KUAN and S. L. SASS 1473

The relationship between dislocations and disclinations
By M. J. MARCINKOWSKI..... 1499

The effect of applied stress on partial dislocation separation and dislocation substructure in austenitic stainless steel
By H.-J. KESTENBACH 1509

Application of scanning transmission electron microscopy to semiconductor devices
By T. G. SPARROW and U. VALDRÈ 1517

Correspondence:

A comparison of the electron band structures of orthorhombic and rhombohedral arsenic
By D. W. BULLETT 1529

Group velocity and minimum metallic conductivity
By T. LUKES and R. S. TRIPATHI 1533

Direct observation of grain-boundary diffusion by scanning Auger microscopy
By A. P. JANSSEN, J. A. VENABLES, J. C. M. HWANG and R. W. BALLUFFI 1537
